MUCHUGIRI INDRA

Data Analyst

+91 7569948639 | indramuchugiri0@gmail.com | LinkedIn | GitHub | Portfolio | Hyderabad, India

PROFESSIONAL SUMMARY

Data Analyst (SQL, Python, Power BI, Excel) with 8 months of internship experience, turning **1.1M+ records** into clear business insights. Found that the **top 20% of customers bring 77% of revenue** and that **late orders score 2.57 vs 4.29** for on-time orders. Available immediately in Hyderabad.

WORK EXPERIENCE

Data Analyst Intern

Dec 2025 - Jul 2026

Teamyuva Techno Solutions Pvt. Ltd.

- Analyzed hotel booking data (data cleaning, EDA, validation) and found **37.3% of bookings are cancelled**: **41.9%** at City Hotels vs **28.0%** at Resort Hotels.
- Found that longer lead time means more cancellations: **9.7%** for bookings made 0 to 7 days ahead vs **57.1%** for 180+ days ahead.
- Found Online Travel Agents bring **47% of bookings** and **52.7% of revenue**, with 36.8% cancellations.
- Recommended stricter deposit and confirmation rules for long lead-time bookings; built **Power BI dashboards** to track bookings, cancellations and revenue.

Tools Used : Python, SQL, Excel, Power BI

PROJECTS

Customer Analytics & Retention - Online Retail II | GitHub · Dashboard

- Cleaned **1.07M raw transactions to 805,549 valid records** (5,878 customers) using Python (data cleaning, validation).
- Built **RFM segmentation** (6 groups): the **top 20% of customers bring 77% of revenue**, so retention effort can focus on them.
- Found **284 At Risk customers with £1.04M** in past spend, more than the whole Lost group: a ready list for **win-back campaigns** (16 MySQL queries: CTEs, NTILE, LAG).
- Built a **3-page Power BI dashboard** (DAX) with segmentation, revenue and cohort retention so managers can track customer value in one place.

Tools Used : Python, MySQL, Power BI, DAX

Olist E-Commerce - Delivery, Revenue & Retention | GitHub · Dashboard

- Cleaned and validated **96,470 delivered orders** across 5 tables using Python, pandas and MySQL.
- Found **8.1% of orders arrive late** and get much lower ratings: average review **4.29 on-time vs 2.57 late**.
- Recommended a **proactive delay-alert system** to protect customer satisfaction; analyzed monthly revenue trends, top categories and repeat-customer rate.
- Built a **Power BI dashboard** (revenue, order value, late %, reviews) and cross-checked **R$13.22M** revenue in Python, SQL, Excel and Power BI.

Tools Used : Python, MySQL, Excel, Power BI

SKILLS

Programming :	Python, SQL (CTEs, Window Functions)
Data Analysis :	Pandas, NumPy, EDA, Statistics, Hypothesis Testing
Visualization & BI :	Power BI, DAX, Excel, Matplotlib, Seaborn
Database :	MySQL
Tools :	Git, GitHub, Jupyter Notebook, Google Colab

EDUCATION

Dr. Samuel George Institute of Engineering and Technology | JNTUK

2026

B.Tech — Computer Science & Engineering *CGPA : 7.5 / 10*

- **Coursework:** Data Analytics, Statistics, SQL & Database Management, Data Visualization, Business Intelligence, Python Programming, Probability.
